Subject: Elkhorn 'Firewise' Efforts

Hi Kim,

I just forwarded some emails that I think show how active Elkhorn has been with regard to its wildfire mitigation efforts. I hope that this is what you were looking for.

It should also be noted that over the past several years, DNRC has completed major fuels reduction projects adjacent to Elkhorn property on the south, east, and north sides of Elkhorn. USFS has done fuels reduction work on USFS property adjacent to the north of our property, and the USFS land just west of Spragg's and east and south of Molly Miller and Mark Jungerman. As you already know, Two Bear Ranch has completed extensive fuels reduction projects to the north of Elkhorn.

You should also have the map of the fuels reduction project in the Beaver Lake area attached to one of the emails from Mike West of USFS.

I hope this helps. Please let me know if you need anything else. Good luck.

Best,

Mike Frost
